Issue No. 2, August 1988

The Role of Hydrophobicity in the Ames Test. The Correlation of the Mutagenicity of Nitropolycyclic Hydrocarbons with Partition Coefficients and Molecular Orbital Indices
R. L. Lopez de Compadre, A. J. Shusterman, and C. Hansch 91

Linear Integrability of Wave Functions
T. Koga and A. J. Thakkar 103

A Regular Periodic Table of the Elements and Its Quantum Mechanical Requirement
D. Purdela 107

Simplified Expansion of Slater Orbitals about Displaced Centers
J. Fernández Rico, R. López, and G. Ramirez 121

Conformational Preferences of Modified Nucleic Acid Bases N^6-(Δ^2-isopentenyl) Adenine and 2-Methylthio-N^6-(Δ^2-isopentenyl) Adenine by the Quantum Chemical PCILO Calculations
R. Tewari 133

Nonlinear Dynamics of a Model Hydrogen Bond
S. Besnainou 143

Reduced-diabatic Vibrational Close Coupled Treatment of Molecular Dissociation Dynamics
P. Pernot, O. Atabek, J. A. Beswick, and B. Levy 161

Letter to the Editor

Control over Theoretical Descriptions of Atoms and Molecules. An Information Theoretic Approach to the Automatic Classification and Systematic Improvement of Approximate Wave Functions
G. Maroulis 185

Announcement 191

Announcement 193

Erratum

Spin and Charge Densities from Hiller–Sucher–Feinberg Identities. Test Calculations for He, B, C, N, O, and F Atoms and H_2O, N_2, and CH_3 Molecules
K. Ishida 195

Issue No. 3, September 1988

A Computational Analysis of *Ortho*-lithiation in Aromatic Systems
K. Jayasuriya and S. Iyer 199

Further Evaluation and Development of Charge Similarity Indices for Choosing Molecular Analogues
A. M. Richards and J. R. Rabinowitz 207

The Generalized Padé Approximants and Chemical Graph Theory
J. Cioslowski 217

Extrapolation of the Total Energy of Polymers to the Bulk Limit Using Generalized Padé Approximants
J. Cioslowski and D. Bessis 225

Eigenlevel Calculations for Screened Coulomb Potential Systems via an Integration-free Algorithm: Space Pruning Technique
N. A. Baykara and M. Demiralp 231

Interaction Energy in Small N-particle Systems and the Permutation Group
A. Holas, H. Działak, and S. Olszewski 247

Core/Valence Partition and Relativistic Effects in Effective Potentials for Transition Metals
L. F. Pacios and P. G. Calzada 267

Intershell *nl4f* Electron Correlation Effects
K. Jankowski, P. Malinowski, and A. Sokołowski 279

Natural Energy Orbitals and the One-particle Green's Function
L. J. Holleboom, J. G. Snijders, and E. J. Baerends 289

Letter to the Editor

C. A. Coulson and the Surface Energy of Metals: A Further Comment
G. G. Hall 301

Addendum

Method of Local-scaling Transformations and Density Functional Theory in Quantum Chemistry. III. The Energy Density Functional: Spin-restricted Approach
E. S. Kryachko, I. Zh. Petkov, and M. V. Stoitsov 305

Announcement 307

Issue No. 4, October 1988

Shape Wave in Density Functional Theory
A. Tachibana 309

Graph Theory of Molecular Orbitals Beyond Tight-binding Approximation
Z. Zhou 325

Particle-Hole Symmetry and Complementary Quantum Systems
T. P. Živković 333

Structure and Properties of Nonclassical Polymers VII. Polymers with Heteroatoms
N. N. Tyutyulkov, C. I. Ivanov, I. Schopov, O. E. Polansky, and G. Olbrich 361

Estimation of Minima in $^1A_1$ States of the Ozone Molecule
F. Moscardó, R. Andarias, and E. San-Fabián 375

Inclusion of Relativistic Effects into ZDO Methods. III. A Quasi-Relativistic INDO/1 Version
R. Boča 385

Letter to the Editor

Numerical Comparison of the Cooley and Kobeissi Methods for Solving the One-Dimensional Schrödinger Equation
J. Tellinghuisen 401

Issue No. 5, November 1988

Convergence Radii of the Perturbation Expansions for the Ground-state Energies of Finite Hubbard Models
K. Hashimoto, J. Čížek, and J. Paldus 407

Total π-Electron Energy in the "Variable β" Hückel Method
J. Cioslowski 417

Modified All-valence INDO/*spd* Method for Ground and Excited State Properties of Isolated Molecules and Molecular Complexes
J. Lipiński 423

Effects of Contraction and Reduction of Basis Set Size on the He_2 Interaction Energy Components
S. Roszak and W. A. Sokalski 437

An Indexing Scheme for Spin-free Configurations of Electrons
K. V. Dinesha, S. Rettrup, and C. R. Sarma 445

An Algebraic Hamiltonian for Electronic and Nuclear Degrees of Freedom Based on the Vector Model
T. A. Holme and R. D. Levine 457

Optical Activity of Small Peptide Chains with Right-handed α-Helix Structure
A. Volosov 471

Book Reviews

Advances in Chemical Reactions Dynamic. Edited by P. M. Rentzepis and Ch. Capellos
Reviewed by P. Froelich 483

Structure and Dynamics of Molecular Systems. II. Edited by R. Daudel, J. P. Korb, J. P. Lamaistre, and J. Maruani
Reviewed by P. Froelich 485

Relativistic Theory of Atoms and Molecules. A Bibliography 1916–1985. By P. Pyykko
